II. For questions 1–10, read the text below and decide which answer (A, B, C or D) best fits each gap. (10 × 1 p = 10 points)**Cooking: More Than Just a Daily Routine**

For many people, cooking is simply a daily necessity, something that must be done in order to eat. For others, however, it is an activity that allows them to relax and (1)---- their creativity. Preparing meals at home gives people a sense of control over what they eat, from the ingredients they choose to the size of each (2) _____.

One of the greatest advantages of cooking at home is that it encourages healthier habits. When people prepare their own food, they are more aware of what goes into their meals and are less likely to (3) ____ on processed products. As a result, home-cooked food is often more nutritious and satisfying.

Cooking can also be a social experience. When meals are prepared together, the responsibility is shared, which often (4) ____ to better communication and stronger relationships. Even simple dishes can become enjoyable when they are made in a good (5) ____ and with a sense of cooperation.

Of course, cooking is not without its challenges. A small mistake can easily (6) ____ in a disappointing result, especially for inexperienced cooks. However, such moments usually help people learn from their errors and become more confident. Over time, they are more willing to (7) ____ with new recipes and techniques.

For many, cooking eventually becomes more than just a skill. It turns into a habit that provides both practical (8) ____ and personal satisfaction. After a long day, spending time in the kitchen can help people (9) ____ and focus on something positive. In this way, cooking continues to play an important (10) ____ in everyday life.

**Questions:**

I. READING

Read the text below and do the tasks that follow.

Hotels of the future- Our travel correspondent Joana Richards reports about a new trend in hotels.

I recently visited a hotel in France which has no visible human staff. This is just one of several hotels in Europe and Asia which runs with apparently no human contact. Most of the services are provided by robots and machines. The concept is to provide an environmentally friendly hotel where staff and running costs kept to a minimum. Personally, I've spent my life away from robots and machines, and so kept having to remind myself that in many parts of the world, it is not unusual for jobs and household tasks to be automated these days.

So I lost no time in booking myself a room at one of these hotels and going to see it for myself. And sure enough, there at the reception desk, instead of a friendly receptionist wearing a uniform, was a machine. 'I'd like to check in please', I shouted, wondering if the machine would respond to my voice, and feeling thrilled that I was about to have my first ever conversation with a check-in machine. Nothing. I said it again but there was silence. I was hoping the machine would say something like 'If you want to check in, press 1'. But then I noticed a written message in the machine's screen. 'Please insert your credit card and key in your booking reference, then follow the instructions.' No conversation. How disappointing.

Staying at the hotel costs from €35 (more if you want a bigger room). That's a bargain for Paris, where a stay in a more conventional hotel can easily cost two or three times that much. And if you did stay there, it wouldn't necessarily be any nicer, and certainly wouldn't be any more memorable. The hotel is located near to the amusement park, Disneyland Paris, which was created as a visitor attraction on the east of the city with lots of amusement rides. In fact, many of the guests book the hotel purely in order to be close to the park.

Back in the hotel, as well as machines to check in, there are vending machines to serve drinks and snacks and vacuum cleaners that work without a human, using sensors to navigate around the rooms. According to the owners, the laundry has robots which do all the washing unaided. Another innovation is the use of face recognition instead of keys to get into your room. A photograph of the guest's face is taken at the reception desk by the check in machines.

With 60 rooms in the building, there is a lot of coming and going. Guests are actively encouraged to stop and get a coffee from one of the machines in the guest lounge with other guests, so there is at least some social interaction. One area where humans are absolutely essential for the hotel is security. There are scanners and CCTV cameras everywhere, and the footage from these is watched by human security guards, no matter whether or not the hotel is full. It is their job to make sure that the guests are safe – and that no-one causes any damage to hotel property, including of course making off with a costly robot.

Critics say that businesses like these automated hotels will mean that people lose their jobs, as more and more roles can be performed by robots and machines. But there are many who see them as a vision of the future and argue that robots can make our lives easier. But **this** can only happen if higher manufacturing and operating standards are achieved, and if guests are prepared to put their trust in machines and don't mind the lack of personal contact. Only then will this type of hotel be a success. Time will tell if this is the case.

I. For each question decide which answer (A, B, C or D) fits best according to the text (5x2p=10p)

1 The aim of this hotel is to be very

- A.** efficient.
- B.** friendly.
- C.** famous.
- D.** unusual.

2 What aspect of the writer's experience at reception was 'disappointing'?

- A.** the appearance of the reception
- B.** the time she wasted checking in
- C.** the lack of verbal interaction with the machine
- D.** the rudeness of the other guests

3 What does the writer say about the price of the rooms in the hotel?

- A.** The hotel is good value.
- B.** The prices are likely to rise.
- C.** Other hotels provide better accommodation.
- D.** It is not always clear how much a room will cost.

4 What is the writer's main point in the fourth paragraph?

- A.** There are limits to what robots and machines can do.
- B.** Robots and machines can learn a wide range of skills.
- C.** Different robots and machines are used for different tasks.
- D.** Humans make mistakes that robots and machines do not make.

5 What does 'this' in the last paragraph refer to?

- A. more roles being performed by robots and machines
- B. many seeing the hotel as a vision of the future
- C. robots and machines make our lives easier
- D. reduction in social human contact

II.WRITING**40 points**

Your school magazine is organizing a competition. They have asked their readers to send in reviews of a highly automated hotel that relies on technology instead of human staff. Express your opinion about the experience, discussing both the advantages and disadvantages of this type of accommodation. Consider aspects such as comfort, efficiency, price, social interaction, and the possible impact of automation on jobs. The best reviews will be published in the school magazine. You decide to enter the competition.

Write your **review** in 200-220 words.

A. Read the text below and choose from the sentences A-F the one which fits each gap. There is one extra sentence which you do not need to use. (10 × 1 p = 10 points)

NOTĂ:**SE ACORDA 10 PUNCTE DIN OFICIU****TOTAL 100 DE PUNCTE****TOATE SUBIECTELE SUNT OBLIGATORII.****TIMPUL DE LUCRU ESTE DE 3h.**
